

Amendment to the Claims

1-41. (Canceled)

42. (Currently amended) Apparatus which provides a dry environment around the eyes of the user comprising:

an eye enclosure adapted to provide an enclosed area simultaneously about the both eyes of the user without obstructing vision through the enclosure;

means for retaining the eye enclosure in position; and

means for supplying dry air to the eye enclosure.

43. (Previously presented) Apparatus according to Claim 42 wherein the dry air will be air having a humidity of about 40% or less.

44. (Previously presented) Apparatus according to Claim 42 wherein the dry air is generated by passing the air through a container of a suitable desiccant or by passing the air across condensation coils.

45. (Previously presented) Apparatus according to Claim 42 wherein the dry air is pumped to the eye enclosure.

46. (Previously presented) Apparatus according to Claim 42 wherein the dry air provided to the eye enclosure is provided from a source of dry air and a source of wet air which are mixed such that a desired level of dryness can be achieved.

47. (Previously presented) Apparatus according to Claim 46 wherein the wet air is generated by passing the ambient air through water or a mixture of water and glycerol.

48. (Previously presented) Apparatus according to Claim 46 wherein the apparatus includes means for measuring the relative humidity of the mixed air present in, or supplied to, the enclosure, and means for adjusting the mixture so that the desired level of humidity may be achieved.

49. (Previously presented) Apparatus according to Claim 48 wherein the measurement means and the adjustment means allow the alteration of the humidity of the air supplied to the eye enclosure to be adjusted during operation.

50. (Previously presented) Apparatus according to Claim 48 wherein the wet and dry air is mixed in a mixing chamber before being supplied to the eye enclosure.

51. (Previously presented) Apparatus according to Claim 42 wherein the means for supplying dry air to the eye enclosure allows for substantially equal air flow to the region of each eye.

52. (Previously presented) Apparatus according to Claim 42 wherein the eye enclosure is a pair of goggles.

53. (Previously presented) Apparatus according to Claim 52, wherein the goggles have two chambers each to cover one eye.

54. (Previously presented) Apparatus according to Claim 52 wherein the goggles are made of plastics material.

55. (Previously presented) Apparatus according to Claim 42 wherein the apparatus is portable.

56. (Previously presented) Apparatus according to Claim 42 wherein the apparatus includes means for adjusting the temperature of the air which is present in, or supplied to, the eye enclosure.

57. (Withdrawn) A method of testing an item to be applied to the eye comprising: applying the test item to at least one of the user's eyes;

subjecting the user to an environment around the eyes that is adjusted from the ambient environment by providing an eye enclosure and adapted to provide an enclosed area about the eyes of the user and supplying air having the adjusted environment to the eye enclosure; and monitoring the user.

58. (Withdrawn) A method of testing an item to be applied to the eye comprising: subjecting the user to an environment around the eyes that is adjusted from the ambient environment by providing an eye enclosure adapted to provide an enclosed area about the eyes of the user and supplying air having the adjusted environment to the eye enclosure;

applying the test item to at least one of the user's eyes;
and monitoring the user.

59. (Withdrawn) The method according to Claim 58 wherein the eye enclosure is removed before the test item is applied.

60. (Withdrawn) The method according to Claim 59 wherein the eye enclosure is replaced once the test item has been applied to the at least one of the user's eyes.

61. (Withdrawn) The method according to Claim 58 wherein the monitoring of the user is carried out periodically or continuously while the user is wearing the eye enclosure

62. (Withdrawn) The method according to Claim 58 wherein the monitoring of the user is carried out once the subsection of the user to the chosen environment is completed or the user may periodically remove the eye enclosure for monitoring to take place.

63. (Withdrawn) A method of screening patients comprising the steps of: subjecting the user to an environment around the eyes that is adjusted from the ambient environment by providing an eye enclosure and adapted to provide an

enclosed area about the eyes of the user and supplying air having the adjusted environment to the eye enclosure; and
monitoring the user.

64. (Withdrawn) The method of Claim 63 wherein the method is used to compare the performance of contact lens materials, contact lens care products and medicaments.

65. (Withdrawn) A method for diagnosing ocular and/or systemic medical conditions comprising:

subjecting the user to an environment around the eyes having an environment that is adjusted from the ambient environment by providing an eye enclosure and adapted to provide an enclosed area about the eyes of the user and supplying air having the adjusted environment to the eye enclosure; and
monitoring the user.

66. (Withdrawn) The method according to Claim 65 wherein the environment adjusted from the ambient environment has one or more of an adjusted humidity, an adjusted temperature and the addition of a foreign body.

67. (Withdrawn) The method according to Claim 65 wherein the foreign body is pollen or pollutants.

68. (Withdrawn) The method according to Claim 65 wherein the ocular condition is dry eye syndrome.

69. (Withdrawn) A method of treatment for patients having ocular and/or systemic medical condition comprising:

an eye enclosure adapted to provide an enclosed area about the eyes of the user;
means for retaining the eye enclosure in position; and
means for supplying air having a required humidity to the eye enclosure.

70. (Withdrawn) The method according to Claim 69 wherein the ocular condition is dry eye syndrome.

71. (Withdrawn) The method according to Claim 69 wherein the air provided to the eye enclosure has an increased humidity of at least 50%.

72. (Currently amended) Apparatus for use in testing an item to be applied to the eye comprising:

an eye enclosure adapted to provide an enclosed area simultaneously around the both eyes of the user without obstructing vision through the enclosure;

means for retaining the eye enclosure in position; and

means for supplying air to the eye enclosure having an environment that is adjusted from the ambient humidity.

73. (Previously presented) Apparatus according to Claim 72 wherein the test item is contact lens, contact lens material, contact lens care products, eye care products or medicaments.

74. (Previously presented) Apparatus according to Claim 72 wherein the test item is eye drops for use in the treatment of dry eye syndrome.

75. (Currently amended) Apparatus for use in screening a patient comprising:

an eye enclosure adapted to provide an enclosed area simultaneously around the both eyes of the user without obstructing vision through the enclosure;

means for retaining the eye enclosure in position; and

means for supplying air to the eye enclosure having a humidity that is adjusted from the ambient humidity.

76. (Previously presented) Apparatus for use in diagnosing ocular and/or systemic medical conditions comprising:

an eye enclosure adapted to provide an enclosed area simultaneously around the both eyes of the user without obstructing vision through the enclosure;

means for retaining the eye enclosure in position; and

means for supplying air to the eye enclosure having a humidity that is adjusted from the ambient humidity.

77. (Previously presented) Apparatus according to Claim 76 wherein the ocular condition is dry eye symptoms.

78. (Currently amended) Apparatus for use in treating a patient suffering from symptoms of ocular and/or systemic medical condition comprising:

an eye enclosure adapted to provide an enclosed area a simultaneously around the both eyes of the user without obstructing vision through the enclosure;

means for retaining the eye enclosure in position; and

means for supplying air to the eye enclosure having a humidity that is adjusted from the ambient humidity.

79. (Previously presented) Apparatus according to Claim 78 wherein the environment is adjusted from the ambient environment has one or more of an adjusted humidity, an adjusted temperature and the addition of a foreign body.

80. (Previously presented) Apparatus according to Claim 79 wherein the foreign body is pollen or pollutants.
